FOR IMMEDIATE RELEASE

Equitech to Raise \$4.2M for New Products

Mullica Hill, NJ, September 13, 2021

Equitech Int'l Corporation (stock exchange ticker EQTL), a manufacturer of opto-electronic solutions for process management, announced that it is raising \$4.2 million dollars to fund completion of two new products, improve its EquiSpec IPS, and increase the company's worldwide sales and marketing efforts.

"In August of 2021, Equitech secured an eighty one percent 81% ownership interest in CompSOL USA. This acquisition added vital strength to the Company providing engineering capabilities we did not have before. The companies are now working on two new and revolutionary products that should be in the market in 2022", said Dr. Jaime Gómez, President & CEO.

"CompSOL is licensing two new technologies that are aligned with the company's core competency (opto-electronic solutions). These technologies have been developed over several years of R&D and bring significant savings to the semi-conductor and automotive industries", said Dr. Jonathan Babaie, Director of Technology. "We need additional resources to begin manufacturing and commercializing the systems", added Babaie.

Equitech recently published a Private Placement Memorandum (PPM) for Accredited Investors. Anyone wishing to consider investment in the company should contact Mr. David Tingley, Vice President of Public Relations at dtingley@equitechintl.com

Equitech is the inventor and developer of the EquiSpec™, an in-line UV-Vis Spectrophotometer IPS), and a myriad of fiber optic probes such as the Reflection Polymer Melt Probe (RPMP) and the Transmission Polymer Melt Probe (TPMP) useful in polymer extrusion operations. These probes as well as other specialized ones allow the measurement of color and chemical composition in molten polymers, liquids, and gases as well as slurries, pastes, and solids.
